

# Corporate Sustainability and Advisory Services

## Discover, Develop, Disclose, and Design

Corporate requirements and customer requests for Environmental, Social, and Governance (ESG) reporting, carbon footprinting, and other related data will increase significantly over the next several years. Whether you are working to meet internal or external commitments, Terracon can be your valued partner guiding you through the complexities associated with managing data, ESG reporting, and developing a strategy to meet your Sustainability goals.

**Data Solutions:** Capturing consistent and quality data can be one of the most challenging aspects of a sustainability/ESG program. Terracon's environmental professionals in more than 175 offices across the country can be cost-effectively leveraged to aid in the collection

and analysis of your local ESG data. Terracon's data advisors can design and utilize spreadsheets, databases, and third-party platforms to simplify your ESG data management.

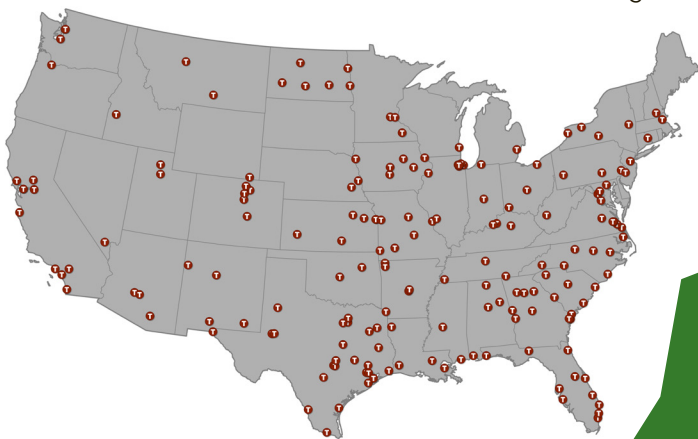

**Carbon Conscious Design and Accounting:** Beyond ESG data collection and reporting, Terracon's carbon team has the experience to establish, evaluate, and report on your emissions.

We provide our carbon accounting and reduction specialists the tools to stay current with ever-changing requirements, standards, and protocols, and are ready to work on a variety of carbon conscious design or accounting projects. Services include:

- Prepare sustainability/ESG disclosures
- Prepare carbon action/management plans

- Evaluate ESG due diligence
- Calculate carbon emissions for your organization (Scope 1, 2, 3)
- Develop carbon strategies
- Develop custom GSG emission factors based on your operations
- Conduct energy efficiency audits
- Provide design options to decarbonize your operations
- Calculate and report greenhouse gas (GHG) emissions per EPA's Mandatory GHG Reporting Program

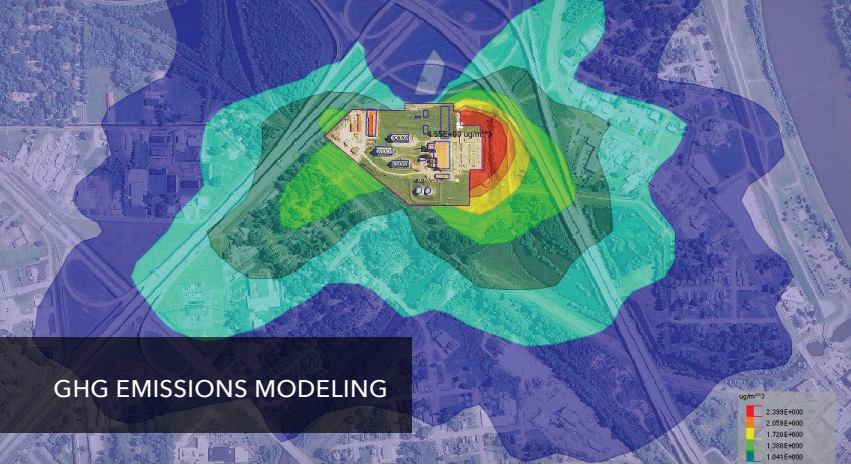

**Waste Minimization and Water Conservation:** In addition to carbon conscious services, Terracon staff is experienced with evaluating and minimizing waste generation and water-use.

ecovadis  
2022  
Bronze  
Medal

*We have been reporting and disclosing ESG measurements to EcoVadis, a third-party verification system, since 2019, and have received a Bronze medal each year. We also disclosed to the CDP, reporting in 2021 and 2022.*

**Terracon calculates and reports GHG emissions for more than 1,600 sites every year.**

**GHG EMISSIONS MODELING**

Whether your needs include monitoring water-use or waste generation, conducting a waste characterization study, or developing minimization plans, Terracon has the experts to support you along your journey.

**Advisory Services:** Our professional team includes chemical and environmental engineers and scientists, carbon accounting and reduction specialists, building energy and materials specialists, and landscape architects who specialize in natural, positive solutions and sustainability development.

We can help you evaluate and resolve the ESG data management puzzle, so you can meet climate commitments, attract a new generation of eco-minded talent, and increase operational efficiencies. As your corporate sustainability partner, we can also help you with these additional offerings:

**ESG Disclosure/Reporting Guidance**

- EcoVadis
- ISNetworld
- Avetta
- CDP Worldwide

**Discover Carbon Reduction Opportunities**

- Energy Audits
- Leak Detection and Repair (LDAR)
- Property Condition Assessments
- Building and Occupant Health
- Emissions Benchmarking

**Develop Carbon Strategies**

- Carbon Accounting
- Carbon Management Training
- Data Collection and Tracking
- Internal Cost of Carbon Analysis

**Design Projects with Carbon in Mind**

- Green Infrastructure
- Carbon Offsets
- Environmentally-friendly Development
- Ecological Sustainability Assessments
- Emission Control Systems
- Nature-based Solutions
- Wind Foundation Design
- LEED Assessments

**Additional Sustainable Services**

- Ecological Planning and Restoration
- Carbon, Water, and Waste Management
- Disaster Planning, Response, and Recovery
- Sustainable Site Development and Design
- Community Resiliency

**Terracon assists clients achieve their short-term carbon emission reduction goals and advise on plans to reach long-term goals including attaining carbon neutrality.**

*"Terracon's service on and contributions to the 2030 sustainability goals working groups has been invaluable. Their needed expertise and professionalism in working with other consultants on behalf of MAC's interest helped result in roadmaps to achieving the emissions and waste reduction goals that are data-driven and sensible."*

-CHRISTENE SIROIS KRON,  
METROPOLITAN AIRPORTS COMMISSION

**Terracon worked with clients to identify carbon reduction opportunities resulting in our clients reducing carbon emissions by almost 50,000 metric tons between 2021 and 2022.**
